## Diploma Thesis

Title	<i>Navigation of Humanoid Robot Nao In Unknown Space With Dynamic Obstacles</i>
Supervisors	Professor Nikos Aspragathos & Professor Emmanouil Psarakis & Ph.Dc Aris Synodinos
Description	This thesis dealt with all the fields that give the ability to humanoid robots to move autonomously in a previously unknown space. It was, mainly, a software development project with a brief bibliographic overview of the major algorithms and techniques in each individual field. The "small" humanoid NAO (from Aldebaran Robotics) was used for the experiments and ROS (Robot Operating System) as the programming framework.
